Impact of Climate Change on Water Resources

With Modeling Techniques and Case Studies

Series: Springer Climate

- ▶ Gives an overview of various aspects of climate change by integrating global climate models, downscaling approaches and hydrological models
- ▶ Covers themes which help to understand climate change in a holistic manner
- ▶ Power point presentations on selected topics for classroom lectures help readers comprehend the methodology and attempt to solve similar problems
- ▶ Includes worked-out examples, problems and case studies

This book gives an overview of various aspects of climate change by integrating global climate models, downscaling approaches, and hydrological models. It also covers themes that help in understanding climate change in a holistic manner. The book includes worked-out examples, revision questions, exercise problems, and case studies, making it relevant for use as a textbook in graduate courses and professional development programs. The book will serve well researchers, students, as well as professionals working in the area of hydroclimatology.
